NOTICE

To: Commercial Feed Licensees Storing Feed Ingredients

With the recent winter storms hitting California, the Feed, Fertilizer, and Livestock Drugs Regulatory Services (FFLDRS) branch is reminding licensees who store and distribute commercial feed in California, about the moisture regulation in the California Code of Regulations section 2694(l).

- **Maximum percentage moisture or minimum percentage dry matter shall be guaranteed when moisture exceeds 15.0 percent.**
- **When dried animal waste (i.e. poultry litter) is used in a mixed feed, the moisture of the mixed feed shall not exceed 12.0 percent.**

The definitions for the following products have maximum moisture specifications that must be guaranteed on the label.

- **Whole cottonseed, prime whole cottonseed, and almond hulls shall not contain more than 13.0 percent moisture.**

2773.5. Almond Hull Definition

Almond hulls are obtained by drying that portion of the almond fruit which surrounds the nut. They shall not contain more than 13.0 percent moisture, nor more than 15.0 percent crude fiber, and not more than 9.0 percent ash.

2783. Whole Cottonseed Definitions

Whole cottonseed is seed remaining after removal of fiber in the ginning process. It shall contain not more than 15.0 percent free fatty acids in the oil. It shall contain not more than 13.0 percent moisture and not more than 2.0 percent foreign material. It shall be labeled to include the maximum percent ash.

Prime whole cottonseed is seed remaining after the removal of fiber in the ginning process. It shall contain not more than 3.0 percent free fatty acids in the oil. It shall contain not more than 13.0 percent moisture and not more than 2.0 percent foreign material. It shall be labeled to include the maximum percent ash.

If the moisture exceeds the level in the definitions for whole cottonseed and almond hulls, the product must be labeled as "high-moisture whole cottonseed" or "high-moisture almond hulls," along with the moisture maximum guarantee.

If you have any questions about the commercial feed moisture regulations in California, please call the FFLDRS branch at the number above.

Sincerely,

Michael Davidson, Program Specialist
